STUDENT RESEARCH OPPORTUNITIES

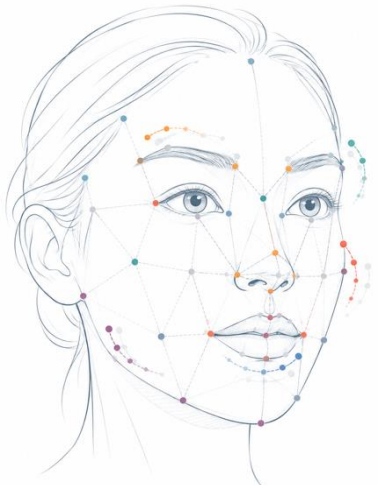

Domain-Informed ML • Computational Modeling for Human Health

Join the **Twin Intelligence Lab** and contribute to interdisciplinary research at the intersection of engineering, AI, and human health.

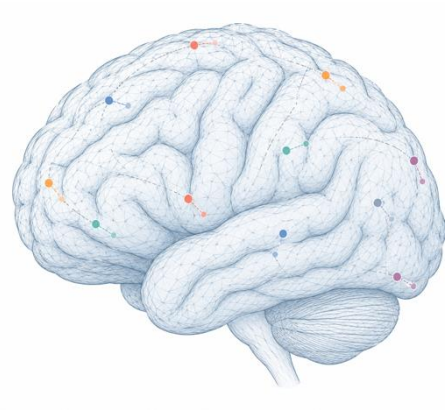

Signal Processing

Wearable Sensing & Time-Series Analytics

Computer Vision

Facial Motion Tracking & Modeling

3D Shape Analysis

Geometric & Computational Modeling

WE ARE LOOKING FOR STUDENTS WITH EXPERIENCE OR INTEREST IN

Multichannel Signal Processing | Deep Learning for Vision | Motion Analysis

3D Shape Analysis | Facial Landmark Tracking | Time-Series Modeling | Sensor Fusion

Experience in one or more areas is preferred. Strong motivation to learn is equally important.
We value curiosity, reliability, independent learning, and consistent research commitment.

WHAT YOU'LL GAIN

- Hands-on research experience
- Faculty and research-team mentorship
- Advanced computational and data-analysis skills
- Opportunities for research presentations and publications*
